

## HUNT FOR BULLET IN SHOULDER OF ROBBER'S VICTIM

M. D. Hughes, Bowers store manager, shot by a robber, was taken from his home to the Garity-Ramsey hospital Monday, where efforts were to be made to remove from his shoulder the bullet received Saturday night when an unidentified white man entered his place, took \$12, shot Hughes and escaped.

Detectives Monday were continuing investigation. They said that an arrest was probable within the next day or so. A good description was furnished officers by Hughes and several clerks who were in the place when the robber entered.

"Put 'em up," was the terse command of the highwayman as he entered Bowers store No. 26, East Third, some of the clerks said Monday. Hughes and his assistants were checking up the day's business. A considerable sum of money, hid under a counter, was missed by the robber, officers declared Monday. The thief made one of the clerks hold a paper sack while he scooped the contents of the cash register into the receptacle. A dash through the front door followed and the robber hopped into an auto and sped away. Entrance was gained through a back window. The thief cut the screen, raised the window and, seeing Hughes standing by a sugar barrel, commanded the manager to throw up his hands. The latter did not comply quick enough for the visitor and one shot was fired. It hit Hughes in the right shoulder and was fired from a distance of about eight feet.

The manager was taken to his home next door, where police had been called. Monday he was removed to the hospital where it was said that his condition was as satisfactory as could be expected.

## Surface Heater Will Increase Efficiency And Save City Money

Thousands of dollars will be saved the city of Memphis by the purchase of a surface heater for use on asphalt streets, according to Commissioner Thomas H. Allen.

The heater will reach Memphis in a short time, and will begin smoothing out the wrinkles in the asphalt streets.

"Under the present plan," Commissioner Allen says, "whenever a roll appears in an asphalt pavement, it is necessary to cut out all of the paving that is out of alignment and replace it with entirely new material."

"This operation is costly and in addition the material is rendered useless and must be thrown away. With the surface heater, however, the machine is placed over the roll, the asphalt is heated and in a very short time is made workable."

"It becomes soft and can be reworked in just the same manner as new asphalt, and the same process is followed. It is raked, and with the addition of just a little new asphalt is rolled and made to conform with the remainder of the pavement."

"It can thus be seen that thousands of dollars in materials alone will be saved."

## County Commission Holds Up Evidence, Saving \$150 Charge

TAMPA, Fla., Oct. 4.—Evidence which may be important in determining the cause of the death of Mrs. E. M. Steinhouse, of this city, whose body was found on the east bank of the Hillsboro river about three weeks ago, lies in the express office here while Coroner Williams is trying to persuade the board of county commissioners that the county should pay the \$150 due on it, which must be paid before he can get the package.

The evidence is the woman's stomach and an analysis of its contents by an Atlanta chemist, to which it was sent by the coroner. Because there were no marks of violence on the body and because a brother of the woman came here from Chicago and announced that he was satisfied there had been no foul play in connection with her death, the board by a tie vote, 3 to 2, decided the county had spent enough money on the case and would not pay the chemist's bill and the expense charges.

## NORMAL CANCELS JACKSON BATTLE

JACKSON, Tenn., Oct. 4.—The game was canceled on the part of the Union university Bulldogs in the opening game of the season, played at the fairgrounds here Saturday afternoon with the Little Rock college eleven, resulting in the score of 28 to 7 in favor of the visitors. The Union team put up a hard fight but was badly outclassed at all stages of the game.

Cancellation of the game scheduled to be played in Memphis next Saturday with the West Tennessee Normal team was announced today.

## Moving Pictures

### Strand.

Exceptionally beautiful scenery is shown in the American classic, "In Old Kentucky," featuring Anita Stewart, which is at the Strand theater all this week. The rough and rugged mountains, the deep ravines, the crystal-clear mountain streams rushing and tumbling down the steep cliffs lend enchantment to this thrilling picture of a mountain girl, who though born among the outlawed moonshiners, wins her way to love and success through her intrepid daring and strength of heart.

### Majestic.

Many charming costumes which will be relished by society women are worn by Elsie Ferguson, the beautiful Paramount picture star, in her latest star vehicle, "Lady Rose's Daughter," now being shown at the Majestic theater.

In the development of the story, which was written by Mrs. Humphrey Ward, the celebrated English novelist, Miss Ferguson plays three parts, the first that of Lady Maude, in the period of 1880, the second that of Lady Rose, the daughter of the foregoing, in the period of 1890, and the third that of Lady Rose, in the period of the present day.

### Princess.

Tremendous "sets" add to the numerous features of "The Mollycoddle," at the Princess, and it was because of the great amount of construction work that was required that this production totaled up to several hundred thousand dollars, more in cost than any previous output from the Fairbanks studio. Among the more noticeable of the "sets" in this picture is an exact reproduction of Monte Carlo and the historic and famous Casino, the playground of the world's idle rich.

## WITH OUR VISITORS

### Suggests Cabinet Position To Care For Home Problems

"There should be a woman in the cabinet to represent child welfare and home economics," is the opinion of Miss Alma Childress, teacher of home economics at Belknap college, Marsden, Minn., at present stopping at Hotel Gayoso. "They are two vital subjects and deserve more attention than they receive."

"The average woman," Miss Childress continued, "wastes fully one-third of her husband's income. It is well said that a French family could live well on what an American family throws away. Now is this all, cooks in restaurants and hotels are shamefully wasteful, not only that but the bulk of them spoil what they do cook. We've got to stop this and nothing could do it so well as a woman in the cabinet."

"It is estimated that every child is worth \$20,000 to the state, that is, of course, every normal, healthy child. We must train mothers to care more and better for their babies. We must do something for the babies that come into the world—through no fault of their own—without a name. We have let matters run haphazard too long. It is time we were taking measures in these important matters and now that women have the vote they should make their influence known. A woman in the cabinet to care for these and kindred matters would go a long way toward eradicating these evils."

### Army Methods Are Greatly Improved

"There is a radical departure in army procedure," claimed W. S. Milford, merchant, of Louisville, Ky., stopping at present at Hotel Gayoso. "Formerly it was almost as hard for the proverbial camel to go through the eye of a needle as for a civilian to get into Camp Knox, located near our city. It was almost as hard for the soldier to get a pass to Louisville. Military wisecracks tried their utmost to keep the two as far apart as possible."

"Now, however," Mr. Milford resumed, "this has all been changed. Soldiers and civilians are being encouraged to fraternize and the result has been a splendid increase in the morale of the enlisted men. Many of the soldiers are being invited to the homes of our best citizens and they are showing in many ways their appreciation of this open-handed hospitality. It is bound to result in great good for both soldiers and civilians. To humanize the army is to popularize it."

### ROYALISTS ACTIVE.

NEW YORK, Oct. 3.—Former King Nicholas of Montenegro, who is in Europe, had a small but active following in Montenegro which is engaged in fomenting strife in the new kingdom of the Serbs, Croats and Slovenes, in the hope of restoring him to the throne, according to a statement issued by the Serbian Child Welfare association of America.

### 9,000 RATS TRAPPED.

PORT ARTHUR, Texas, Oct. 4.—Trappers employed by the United States public health service here have caught to date 9,000 rats. Laboratory tests showed no presence of bubonic plague infection in any of them. According to a service statement, the rats cost the government 38 cents each for trapping, not including expense of laboratory work.

## AMUSEMENTS

### "Hitchy-Koo."

The new second edition of Raymond Hitchcock's big musical comedy revue "Hitchy-Koo" will be seen at the Lyric tonight and Tuesday night, with a special matinee on Tuesday. Incidentally, from reports that come from the box office, this far-famed musical comedy revue will be seen by more people of this city than have turned out for a road attraction in many years. The reason is not hard to find. It is evident that an attraction comes to this city direct from a run of two solid years in New York with a guarantee that this is the original production, scenery and costumes, guaranteed to be absolutely intact. Owing to the magnificent production, it is announced that the curtain will rise promptly at 8:10. There are 14 dazzling beautiful scenes in the new edition of "Hitchy-Koo," in most of which that enterprising chorus of six great actresses disport themselves merrily. While the youngsters are running out of one costume into another, the 20 clever principals of the company prevent the audience from becoming restive by appearing before a tableau curtain, singly and in pairs, and doing specialties which made them all famous headliners in "big time" vaudeville.

### Orpheum.

Frisco, exponent of superjazz dancing, and the most famous product of the Barbary Coast school, will headline the bill at the Orpheum this week. Frisco has been doing his original style of dancing for a long time, a good many years. In fact, he has been ahead of the times, until the present, when the public has taken to jazz music and all that goes with it, and the steps of Frisco are the ultimate expression of the delirium tremens of syncopation. Frisco and Loretta McDermott, who is assisting him in his present vaudeville tour, have been the reigning sensation in and around New York for a number of years.

Chas. Howard, assisted by Donata Roberts and Victoria Gale, has a new sketch, "A Happy Combination." It is a good vehicle, one that is just suited to Chas. Howard. The trio combine their joint efforts to making "A Happy Combination" a happy combination. Charlie Wilson is the loose nut from the tree of laughter.

### Loss Estimates Of Martin Fire Vary

Estimates Monday of damage suffered in fire which Saturday night destroyed a portion of the Fontaine Martin residence, 1508 Goodbar place, were at variance. Fire department reports said the total loss had been placed at \$5,000. Members of the Martin family thought that damage to the house, furniture and other fixtures, as well as clothes, would total \$20,000.

The loss was fully covered by insurance. The blaze originated somewhere in the roof and destroyed the top portion of the home.

### MINE UNIONS TO ELECT.

MUSKOGEE, Okla., Oct. 3.—One hundred and sixty-two nominations have been made for the fifteen offices in the district organization of the United Mine Workers of Arkansas, Oklahoma and Texas, publication of the ballot disclosed. The voting will take place this month. The number of aspirants is the largest in the history of the southwestern coal fields.

## Have You a Freckle on Your Face? Why?

Anybody can acquire a freckle, but those wise ones who know and use

### GOLDEN PEACOCK BLEMISH BLEACH

know they need not keep it or any other freckles that may put in an unwelcome appearance.

Golden Peacock Blemish Bleach was made especially to eradicate all blemishes of the skin. So called "Moth Patches," "Liver Spots," as well as Freckles and Discolorations of all kinds vanish before the magic of its gentle persuasive action.

It is absolutely harmless—not irritating but powerfully effective. Apply as a cold cream. On some skins the effect is almost instantaneous. Others require a longer time for the removal of blemishes of long standing. Persistent use will win inevitably. The spots fade out and leave the skin fair and smooth as a child's. PRICE, ONE DOLLAR.

At all druggists or by mail.

PARIS, TENN.

# NASH SIX

## Nash Prices Cannot Be Reduced Because They Have Never Been Inflated

There will be no reduction in the price of the Nash Six.

We think it only fair to state our policy plainly in justice to present Nash Six owners and those who contemplate purchasing this car.

Nash prices cannot be reduced because present prices represent the actual intrinsic value of the product plus a profit sufficient only to maintain manufacturing operations.

That is a plain statement of fact.

We cannot buy the high grade materials used in the Nash Six any cheaper.

We cannot buy the skilled labor employed in the making of the Nash Six any cheaper.

These two factors determine price. Until materials are lower or labor is lower, no one can manufacture such a car as the Nash Six for less money.

We say no one advisedly because here in this great plant covering 101 acres of ground and employing 5000 skilled workmen, manufacturing costs are reduced to their lowest level.

Here, the Nash Six is manufactured 93% in its entirety.

We have every advantage that large resources and a well established business afford—the purchase of raw materials on a big scale, perfected manufacturing processes and the distribution of costs over a large output.

This insures minimum production costs for each individual car.

That is why the Nash Six has always represented exceptionally high value.

The savings made by our manufacturing methods have been given to the buyer, keeping the price of this car at the lowest possible figure.

Consider this fact.

Since 1917, while prices of all commodities have been soaring,

the price of the Nash Six has risen only 31%. Considering the addition of cord tires and other equipment as standard equipment, the actual increase has been only 24%.

During that time, the increased price of other motor cars shows an average rise of 76%.

The cost of living has risen 104%.

These figures show plainly that Nash manufacturing ability does make possible a car of exceptional value, and that Nash selling prices have always been kept low in accordance with our low production cost.

In view of price changes, actual and rumored, we welcome the opportunity to make this statement:

"That the Nash Six today represents more actual value, and is a bigger and better automobile than any other car within hundreds of dollars of its price."

That is our judgment and that it is the judgment of many thousands of motor buyers is evident in the widespread conviction that the Nash Six does represent value impressively above the average.

Under these unsettled conditions it is the only explanation of the fact that today the Nash Motors Company has thousands of unfilled orders on its books and that maximum production schedules are being maintained in our factory.

You may purchase the Nash Six with the assurance that today as always, you are buying a car of exceptional value.

You buy more power with the Nash Six due to its Perfected Valve-in-Head Motor.

You buy comfort and convenience beyond the ordinary.

You buy really exceptional beauty of design and finish.

And you buy a car with the high character of its performance proved beyond question.

### A STATEMENT

Our policy has always been to give the consumer the best automobile and best truck we could build at the least possible cost. We have never asked a dollar more, simply because we could get it.

In view of the fact that there is no reduction today in the price of materials or labor entering into Nash products, and that there is no possibility of any reduction for some time to come that can substantially affect manufacturing costs, the policy of The Nash Motors Company will be to absolutely maintain its present prices on both passenger cars and trucks to at least July 1st, 1921.

C. W. Nash

The Nash Motors Company, Kenosha, Wisconsin

## No Reduction in Nash Truck Prices

The following present prices on both Nash Passenger Cars and Trucks will be maintained

### PASSENGER CAR PRICES:

5-passenger touring car - \$1695	7-passenger touring car - \$1875
2-passenger roadster - 1695	4-passenger coupe - 2650
4-passenger sport model - 1850	7-passenger sedan - 2895

### TRUCK PRICES:

One-ton chassis - \$1895	Two-ton chassis - \$2550
Nash Quad chassis - \$3250
